

The Inherited Cancer Registry (ICARE) is a research initiative representing a clinical-research-community partnership between medical practitioners, researchers, and individuals facing inherited cancer risk. The common goal of our efforts is to improve the lives of individuals and families at risk for inherited cancer susceptibility. As part of our educational outreach, and to show our appreciation to medical practitioners who refer patients to ICARE, the study team hosts a monthly web-based genetics case conference. Practitioners from across the globe involved in cancer risk assessment practices regularly attend and present cases for discussion.

Date	Time	Focus*
Thursday, January 10 th	11:30am – 12:30pm (CT)	Presenter Choice
Thursday, February 14 th	11:30am – 12:30pm (CT)	Inherited Kidney Cancer <i>Guest Expert: Kim Rathmell, MD, PhD</i>
Thursday, March 14 th	11:30am – 12:30pm (CT)	Colorectal Cancer and Polyposis Syndromes <i>(In recognition of CRC awareness month)</i>
Thursday, April 11 th	11:30am – 12:30pm (CT)	Presenter Choice
Thursday, May 9 th	11:30am – 12:30pm (CT)	Tumor Testing/Germline Significance <i>Guest Expert: Ben Park, MD, PhD</i>
Thursday, June 13 th	11:30am – 12:30pm (CT)	Presenter Choice
Thursday, July 11 th	11:30am – 12:30pm (CT)	TBD
Thursday, August 8 th	11:30am – 12:30pm (CT)	Presenter Choice
Thursday, September 12 th	11:30am – 12:30pm (CT)	TBD
Thursday, October 10 th	11:30am – 12:30pm (CT)	Presenter Choice
Thursday, November 14 th	11:30am – 12:30pm (CT)	TBD
Thursday, December 12 th	11:30am – 12:30pm (CT)	Presenter Choice

*Focus may change due to unforeseen circumstances. If there is a change in the focus, all ICARE partners will be notified by email.

Tentative Case Conference Topics

Polygenic Risk Scores
 Inherited Neuroendocrine Cancer
 Tumor Testing/Germline Significance
 Inherited Blood Cancer
 Metastatic Prostate Cancer
 Inherited Pancreatic Cancer
 Pediatric Inherited Cancers
